Professional Experience

Amazon Inc. Seattle, WA
Software Development Engineer Intern (Notifications Platform Team) Jun. 2017 - Sept. 2017

- Updated data sourcing for the billions of notifications sent by Amazon and its subsidiaries
- Simplified the UI/UX of an Angular web app, resulting in less user required training and less inquiries on its usage
- Introduced a fail fast mentality to the program, which improved efficiency and allowed for quicker user feedback

Drexel University Philadelphia, PA
Teaching Assistant (Data Structures and Intro to Programming) Jan. 2017 - Jun. 2017

- Assisted in teaching students OOP principles and data structures concepts
- Responsible for creating answer keys and grading quizzes for a class of over 60 students
- Held open office hours where students could present questions and concerns over the material being taught

Vitris LLC Philadelphia, PA
Co-Owner, Software Developer Feb. 2016 - Mar. 2017

- Created a proprietary appointment and scheduling software with a calendar user-interface
- Architected the back-end of a multi-platform phone repair system
- Raised \$100,000 towards Vitris operations

CrystalFruit LLC Paoli, PA
Co-Founder, Developer, Manager Feb. 2015 - Mar. 2017

- Produced websites, applications and graphical content for a variety clients
- Interfaced with clients to discern key project requirements and deliverables
- Mentored developers in the areas of development, project management, and project lifecycle

Audible Inc. Newark, NJ
Software Development Engineer Intern (Customer Relations Management Team) Sept. 2015 - Mar. 2016

- Built Java components to gather information used in emails sent millions of times each year
- Redesigned Audible's extra credit workflow, resulting in an annual revenue lift of \$350,000
- Boosted email revenue, open rate and response rate by developing email HTML components

Toll Brothers Inc. Horsham, PA
IT-Application Developer Intern Sept. 2014 - Mar. 2015

- Streamlined user interfaces and improved program usability with JavaScript and Visual Basic
- Initiated a data restructuring to improve data consistency and quality
- Migrated Toll Brothers' legal database from an Access back-end to a SQL back-end
